(GSIS)

Who We Are

Founded in 1966, the Geoscience Information Society (GSIS) facilitates the exchange of information in the geosciences through cooperation among librarians, geoscientists, publishers, editors, and other information specialists.

The Society includes both national and international representation from academia, businesses, publishers, governments, societies, and other organizations. Members represent all aspects of the geosciences and address the wide range of information issues faced by those working in the field.

GSIS is a member society of the American Geosciences Institute (AGI) and an associated society of the Geological Society of America (GSA).

Members are encouraged to present posters or papers at the GSA Annual Meeting. The abstracts of the accepted papers are published in the *GSA Abstracts with Programs*.

Awards

The GSIS presents the following annual awards for outstanding contributions in the geosciences: The Mary B. Ansari Best Geoscience Research Resource Award, the Distinguished Service Award, the Best Paper Award, two Best Guidebook Awards, and Outstanding Geologic Field Trip Guide Series Award.

Watermark source: [Popular Science Monthly Volume 54](#)

Publications

GSIS publishes a quarterly newsletter and contributes to the AGI hosted *Geologic Guidebook of North America Database*. The Society also issues *Guidelines for Authors, Editors, and Publishers of Geologic Field Trip Guidebooks*.

Become a Member

To become a member, please visit our website at <http://www.geoinfo.org/membership/>, dues may be paid via PayPal.

Alternate methods for payment of dues can be arranged by contacting the GSIS Secretary, Jenn Thomson via email (jennat@sfu.ca) or mail:

Jenna Thomson, GSIS Secretary
WAC Bennett Library
8888 University Drive
Burnaby, BC
V5A 1S6 Canada

Membership dues run concurrent with the calendar year and are payable in U.S. funds. Dues received after November will be assumed to be for the upcoming calendar year.
